REQUEST FOR EXPRESSION OF INTEREST FOR BULK SUPPLY AND DELIVERY of FLOCCULANTS and FROTHERS

About Lindi Jumbo Ltd

The Lindi Jumbo Graphite project is situated in southeastern Tanzania, about 200 km away from the port of Mtwara. The project area can be accessed from the southern part via sealed roads that lead from Mtwara to Nanganga, which is approximately 15 km to the north of the town of Ruangwa.

Brief description of the scope of the services

Supply and delivery of Flocculants and Frothers

The Frother:

- Polyethylene Glycol Monobutyl Ether (Butyl-TriGlycol) Mixture, molecular weight approximately 200 g/mol. Dow 200, Flotanol 200, Sasfroth 200, Senfroth 200 or equivalent. Supplied in 1000 IBC. Consumption 1000 kg/month.

The Flocculant:

- Poly acrylamide flocculent, Senfloc 5150, Flopam AN912SH or equivalent. Supplied in 25 kg bags, 40 bags on a pallet. Consumption 1000 kg/month.

All additional information regarding this EOI is available at NO COST from the procurement portal, www.webportunities.net.

Companies that have the ability, capacity, and resources to supply the products listed above should express their interest by uploading their proposals via the Procurement portal, www.webportunities.net only proposals submitted via the portal will be evaluated. If you require assistance on the portal, please contact the Tara Nawa team via the portal's contact us page.

Closing Date: 12th April 2024, 4:00PM (GMT +1)
